

# CLAY-DECAY **HDD**

## PRODUCT DESCRIPTION

**CLAY-DECAY** is a proprietary dispersant that effectively and aggressively interrupts reactive clays and stops them from sticking to the bit /cutter. **CLAY-DECAY** is an extremely versatile product that can be utilized in sweeps for cleaning to increase ROP and limit bit-balling. **CLAY-DECAY** is also an effective tool for aiding in viscosity control. By working as a thinner, it gives operators more control over unforeseen and random encountered drilling conditions .

## TYPICAL APPLICATIONS

- Prevents bit-balling.
- Increase penetration rates.
- Helps control viscosity.

## PHYSICAL PROPERTIES

Appearance: Off-white powder

Bulk Density: 40 – 55 lb/ft<sup>3</sup>

## PACKAGING

**CLAY-DECAY** is sold in 25 lb buckets.
