

DRILL-SEAL ^{HDD}

MEDIUM BLEND OF LCM/ SEALANTS

PRODUCT DESCRIPTION

Drill-Seal is a blend of natural plant fibers. These deformable and compressible particles conform to the shape of pores and fractures to provide a bridge and a primary seal against loss of drilling mud.

Drill-Seal can be used as a standalone product, or in conjunction with DrillChem's other proprietary lost circulation materials to combat lost circulation/inadvertant returns. These pills may be used in sweep fashion or spotted downhole to create a lasting seal. Typical concentrations range from 1-2 sacks per 50 gallons.

PRODUCT ADVANTAGES

- Sealing various types of unconsolidated and fragile soil.
- Stopping major losses of mud and fluids in fractured formations.
- Deformable and compressible particles conform to the shape of pores and fractures

PHYSICAL PROPERTIES

- Appearance: Light tan mixture of flakes and granules
- Bulk Density: 15-25 lb/ft³

PACKAGING

- Drill-Seal is provided in 25 lb. bags.
- There are 72 bags per pallet shrink wrapped.
