

TECH DATA SHEET

PRODUCT DESCRIPTION:

CLAY COMMANDER is a powerful multi-front attack for drilling the most challenging clay soils - combining clay stabilization, optimum suspension, and ROP enhancement in one sack.

CLAY COMMANDER is used as a single-sack solution to replace complicated clay drilling mixes. The dry powder easily disperses when mixed in fresh water and can be used in fresh, brackish, or seawater.

APPLICATIONS AND USE:

To mix, add 6lbs. – 12lbs. of **CLAY COMMANDER** per 1,000 gal. of mud. Add in 1 vis cup increments if additional viscosity is needed.

PRODUCT ADVANTAGES:

- High performance suspension and stabilization properties
- Clay inhibition, encapsulation, and dispersion
- Helps prevent sticking clays
- Tolerant to water types: fresh, brackish, seawater

PHYSICAL PROPERTIES:

Appearance:	White to tan powder
Specific Gravity	1.52

PACKAGING:

CLAY COMMANDER is packaged in the following:

- 5-gallon bucket, 4 lb. canister
