

TECH DATA SHEET

PRODUCT DESCRIPTION: ***CLAY DECAY*** is a proprietary dispersant that effectively and aggressively interrupts reactive clays and stops them from sticking to the BHA. ***CLAY DECAY*** is an extremely versatile product that can be utilized in sweeps for cleaning to increase ROP and limit bit-balling

APPLICATIONS AND USE: ***CLAY DECAY*** is ideal for running sweeps to clean off the BHA and can be used as a thinner for viscosity control.

For bit balling, add 1 - 2 lbs. directly down the drill string

PRODUCT ADVANTAGES:

- Compatible with all types of water-based fluids systems
- Helps control viscosity
- Can be added directly down the drill string
- Prevents bit-balling

PHYSICAL PROPERTIES:	Appearance:	Off-white powder
	Bulk Density:	40 - 55 lb/ft3

PACKAGING: ***CLAY DECAY*** is packaged in 5-gallon pails and 50 lb. bag.
