

# EnviroDRY 2.0

## TECH DATA SHEET

**PRODUCT DESCRIPTION:** **ENVIRODRY 2.0** is a proprietary organic based super absorbent polymer blend for use in solidification of aqueous slurries where low dusting is required.

The fast-acting blend is easy to use by quickly turning the slurry to a solid that passes the paint filter test for solid waste disposal. The high efficiency of **EnviroDRY 2.0** allows for low application rates eliminating bulking thus minimizing disposal costs. **EnviroDRY 2.0** is well suited for solidification of water based drilling and potholing fluids.

**APPLICATIONS AND USE:** **EnviroDRY 2.0** should be distributed evenly across the slurry to be treated. Mixing can be done by an excavator.

Addition rates will vary from .5% to 3% depending on the solid content of the slurry and desired set time.

**PRODUCT ADVANTAGES:**

- Will not bulk material
- Fast acting
- Accepted in landfills
- Much more effective than sawdust or fly ash

**PHYSICAL PROPERTIES:**

Appearance:	White granular powder
Bulk Density:	NA
pH:	NA

**PACKAGING:**

**EnviroDRY 2.0** is available in 50 lb. bags
