

TECH DATA SHEET

PRODUCT DESCRIPTION: **EnviroDRY 3.0** is a highly surface cross-linked sodium polyacrylate super absorbent polymer that rapidly solidifies a wide range of liquid-bearing wastes with minimal amendment rates (0.5%-1.5% wt/wt). **EnviroDRY 3.0** features a consistent particle size distribution and no dust.

APPLICATIONS AND USE: **EnviroDRY 3.0** should be distributed evenly across the slurry to be treated. Mixing can be done by an excavator.

PRODUCT ADVANTAGES:

- High absorbency
- Versatile
- Safe and easy handling
- No dust

PHYSICAL PROPERTIES:

Appearance:	White granular powder
Bulk Density:	NA
pH:	NA

PACKAGING: **EnviroDRY 3.0** is available in 50 lb. bags
