

TECH DATA SHEET

PRODUCT DESCRIPTION: ***PAC L FORCE*** is a premium grade high-purity proprietary polyanionic cellulose additive used for rheology and fluid loss control in drilling fluids. It is effective at controlling fluid-loss with a minimum increase in viscosity.

PAC L FORCE is ideal for drilling fluid systems requiring tight filtration control and low rheological properties.

APPLICATIONS AND USE: For fluid loss reduction, add 1 – 2 vis cups of ***PAC L FORCE*** per 500 bbl of mud. Add in 1 vis cup increments if additional fluid loss control is needed.

PRODUCT ADVANTAGES:

- Compatible with all types of water-based fluids systems
- Effective over a wide pH range
- Causes very minimal increase in viscosity
- NSF certified

PHYSICAL PROPERTIES:	Appearance:	Off-white fibroid powder
	pH:	6.5 – 8.0

PACKAGING: ***PAC L FORCE*** is packaged in 25 lb. buckets.
