

SAND COMMANDER

PRODUCT OVERVIEW

UTILITY

SAND COMMANDER

It's no secret that working in sand can come with challenges. Sand Commander from Right Turn Supply is an all-in-one additive designed to combat fluid loss, improve hole stability, elevate gel strengths and clean the hole without significantly increasing downhole pressures. For drilling in challenging sand conditions, simply add one bucket of Sand Commander with two sacks of high-yield (220 bbl) Wyoming bentonite, such as Max Bore HDD. Simplify your sand mix and reduce the number of products you take to the job by using Sand Commander by Right Turn Supply.

- Reduces fluid loss
- Environmentally friendly
- Reduces friction
- Great additive for challenging & larger diameter clay bores
- Elevates cuttings suspension & hole cleaning ability
- Higher concentration = Smaller footprint
- Can be paired with other polymer products in small diameter sand & clay bores
- Increases hole stability

WHAT TO KNOW:

A note from Christian Rich Regional Manager at Right Turn Supply

“Sand Commander is a simple yet powerful sand mix. It strengthens hole stability and improves hole cleaning in bentonite-based mixes while maintaining manageable viscosity. Works alone or with polymer-based products for quick shot bores in mixed and sandy soils.”

MIXING INSTRUCTIONS (PER 500 GAL):

Sand (all diameters): 2-2.5 sacks bentonite + 1 bucket (7 lbs.) Sand Commander

Quick Shot Bores (no reaming): 1 bucket Sand Commander + 1 jug Bore Commander (optional)

AVAILABLE IN 7 LB BUCKETS

SIMPLE SOLUTIONS KEEP YOU TURNING TO THE RIGHT.
