

TECH DATA SHEET

PRODUCT DESCRIPTION: **THIN FORCE** is a low molecular weight, anionic, synthetic copolymer supplied as a high activity aqueous solution for use as a deflocculant in water-based drilling fluids.

The primary application for **THIN FORCE** is to help control the rheology of drilling fluids by reducing viscosity and gel strengths. **THIN FORCE** also helps with fluid loss control.

APPLICATIONS AND USE: Use as needed to lower the viscosity of drilling fluids. Avoid over use.

PRODUCT ADVANTAGES:

- Environmentally friendly
- Highly effective deflocculant
- Allows for enhanced fluid property control

Certificado
NSF/ANSI/CAN 60

PHYSICAL PROPERTIES:

Appearance:	Light amber
Relative Density:	1.0 - 1.4
pH:	6 - 9

PACKAGING:

THIN FORCE is packaged in the following:

- 5-gallon buckets
- 1/2 gallon jugs
